SPLENDID PEONIES

HARDY EVERYWHERE

'ARISTOCRAT OF FLOWERS'

THE wonderful improvements made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of our fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit our field will say, "I have Pink and White Peonies. I desire only Red ones," but when they are shown the Pink and White, they invariably exclaim, "How grand! I have none like them." There is as much difference in Peonies as there is in Roses.

We have found that divisions do not give the customer satisfaction; they have to wait too long for the plant to become established.

For this reason we are not offering any Peony this year under a one-year size.

The one-year plant is a plant divided and reset a year before. We do not advise our customers to divide any of these one-year roots if they want bloom the first year. We find that Peonies should not be divided more than once in three years.

If you want a profusion of bloom the first year, you will find the two and three-year plants will produce more bloom according to their age.

While our strong one-year roots will all bloom for you the first year, the two-year size is the best to buy; for having become established the first year from division, the growth is more than double the second year and the prices are only about one half more.

THE LOGICAL TIME TO ORDER PEONIES

Is when you are "chumming" with them in your own or friend's garden. Memory is too elusive a thing to be trusted! Entrust your wishes to us; write us freely any time concerning Peonies. The full benefit of a quarter century's experience with this wonderful flower is yours to command.

"PEONIES FOR PLEASURE"

This book of "Peonies for Pleasure" gives you information on "Peony History," "Nomenclature," "Six Points of Excellence," "A Month of Peonies," "The Lure of the Peony," "An Appreciation," about Peony culture, soil, drainage, fertilizers and how to apply; planting time and how to plant; varieties for cut flowers; how to grow exhibition flowers. This book describes over two hundred of the choicest kinds. If you want information on the plant that stands next to the Rose in beauty, that is practically known to the amateur as simply a red, white and pink Peony, then send today for "Peonies for Pleasure."

THE GREATEST LIST OF PEONIES EVER OFFERED AT PRICES HERE QUOTED

SPECIAL COLLECTIONS OF PEONIES

To those who do not care for the nomenclature of the Peony, we have made up several collections, and here offer them as an aid to making selections. Patrons will find these varieties embrace a wide range of color and form, and are exceptionally meritorious.

BARGAIN COLLECTION

This collection embraces the Peonies of merit that are a great bargain at the prices here quoted.

- 217—**ALEXANDRE DUMAS** (Guerin, 1862.) Crown type; early. Lively brilliant pink crown interspersed with white, salmon and chamois; creamy-white collar of narrow petals mingled with the wide central petals. Exceptionally floriferous. A very pretty pleasing multi-colored sort, one of the best for massing and an excellent keeper after being cut. One of the earliest of the *Chinensis* type to bloom. **50 cents**
- 240—**AUGUSTE GAUTHIER** (Dessert & Mechin, 1890.) Semi-rose type; midseason. Large, well built flowers, broad, lively red petals in the center, broad silvery border; flowers in huge clusters. Superb. **50 cents.**
- 515—**CHRYSANthemiflora** (Guerin, 1842.) White or ivory-flesh, center yellow and white, with lemon-yellow background. **50 cents.**
- 40—**QUEEN VICTORIA** (Eug. Hort, 1830.) Bomb type; early midseason. The very best every day white. When cut a first rate keeper. Flower of good substance and color; very pretty in the bud state, when it has a faint blush tint; an old standby. **50 cents.**
- 354—**COMTE DE DIESBACH** (Calot, 1873.) Bomb type. Early-Fine crimson-red with silvery reflex; good bloomer. Superb. **50 cents.**
- 363—**DOCTEUR BRETONNEAU** (Guerin, 1850.) Rose type. Large, compact flower, midseason; guards pale lilac; center milk-white shaded amber; fragrant. Tall, strong grower; very free bloomer. Extra commercial variety. **50 cents.**
- 22—**DUC DE WELLINGTON** (Calot, 1859.) Bomb type; late midseason. If it were not for the fact that comparisons are odious, we would make the statement and without fear of successful contradiction that there is no variety of white Peonies that has so many points of excellence as this same old Duke of Wellington. A vigorous tall growing plant with stems sufficiently strong to stand upright. Flowers of enormous size, really gigantic, pyramidal in shape, with high built center. Two rows of large broad guards of pure snow-white, center of flower sulphur-white, free and fragrant; and ideal cut flower. **50 cents.**
- 79—**EDULIS SUPERBA** (Lemon, 1824.) Crown type; very early. This might well be called the Decoration Day Peony, for it has never failed to be in full bloom for May 30th. Our field of thirty thousand plants is a sight never to be forgotten when seen on that date. A most beautiful bright clear mauve-pink with silvery reflex that under good culture measure from seven to eight inches across. One of the most valuable Peonies. June rose fragrance. **50 cents.**
- 104—**FESTIVA** (Donkelaar, 1838.) Rose type; midseason. This variety is sailing under several aliases, such as Festiva Paschalis, or the Passover Peony, in reference to the blood red spots on the white petals. Is also known around Chicago cut flower market as Drop White, in allusion to these same spots. Is often sold as Festiva Maxima and sometimes under the name of Edulis Alba. Blooms of the largest size, double to the center, pure white, prominently crimson flecked. This, in our opinion, is a much prettier flower than Festiva Maxima, having more and larger crimson spots. Blooms one week later than Festiva Maxima. Dwarf grower; desirable for planting as a border to other Peonies or shrubbery. **50 cents.**
- 225—**MADAME LEBON** (Calot, 1888.) Rose type; late. Large full blooms, brilliant cherry-pink tinged aniline-red, collar creamy-white, center flecked crimson. Very showy. **50 cents.**
- 35—**MEISSONIER** (Crousse, 1886.) (Syn. American Beauty.) Bomb type; midseason. Very brilliant crimson; full double flowers on stiff, wiry stems; the stems may sometimes have short crooks in them, but they are never weak. The coloring is wonderfully rich and brilliant. In the Chicago cut flower markets this Peony is known as the American Beauty Peony on account of the resemblance in color to the Rose of that name. A grand cut flower. **50 cents.**
- 61—**NE PLUS ULTRA** (Mieliez, 1856.) Rose type; early midseason. This variety, when well established, is an extremely showy and pretty flower. Color light violet-rose with silvery reflex, central petals overlaid with salmon-pink. A vigorous, strong growing and very desirable Peony. **50 cents.**

CHALLENGE COLLECTION

This collection covers the entire range of form and color in the Peony. We challenge comparison as to their great beauty and to the very low prices we offer them. Not a single Peony here will disappoint you.

- 489—**VICTOIRE DE L'ALMA** (Calot, 1860.) Semi-rose type; late. Color rosy-magenta, tinged scarlet with silvery reflex. **75 cents.**

16—**MADAME DE VERNEVILLE** (Crousse, 1885.) Bomb type; early. One of the most charming varieties on the market. Guard petals are pure white, very large and folding over the flower; the blooms are very full and double, of the purest white suffused with daintiest blush except a few cream-colored petals and four red flakes on central petals; exceptionally free. We have counted sixty-five large, perfect blooms on one plant open at the same time. Certainly a wonder. Has the true June rose fragrance. **75 cents.**

28—**LADY LEONORA BRAMWELL** (Syn. Docteur Bretonneau.) (Verdier, 1854.) Bomb type; early midseason. This Doctor has been masquerading for a number of years under the name of Lady Leonora Bramwell. As Guerin sent out a Docteur Bretonneau, and as this variety is already better known under this name, we will retain same. This is a charming, large, full and exceedingly fragrant flower of perfect symmetrical form. The color is delicate silver-rose with lively pink center; petals tipped creamy-white with an occasional crimson fleck. In many localities grown for cut flowers. Has the true June rose fragrance. It is a fact that Lady Leonora Bramwell will remain in better shape longer when cut and placed in cold storage than any other Peony. It will keep in this manner for two months. **75 cents.**

74—**MADAME MUYSSART** (Calot, 1869.) Rose type; late midseason. Very large, well shaped bloom. Color an even shade of china-pink or soltero-red, tipped silver. Fragrant; tall grower. Very floriferous variety. **75 cents.**

322—**VAN DYCK** (Crousse, 1879.) Crown type; midseason. Guards and center true Enchantress pink. This pink is distinct from all others, as it has not a trace of purple or mauve shades in it. Extra fine. **75 cents.**

167 **VIRGO MARIA** (Virgin Mary.) (Calot, 1859.) Bomb type; late midseason. Exquisite, large, immaculate white flower, delicate and refined; different in character from Festiva Maxima and said by some to follow that variety in excellence. We place this among the leaders and the genuine is scarce. Fragrant. **75 cents.**

150—**MONSIEUR BOUCHARLATAINE** (Calot, 1868.) Semi-rose type; late midseason. Large, full, compact, imbricated bloom, bright pink shaded darker pink with broad silvery reflex. Free bloomer. Excellent for landscape work. **75 cts.**

39—**MARECHAL VALLIANT** (Calot, 1867.) Rose type; late. Immense globes of light red, with shades of mauve. At Chicago flower show in June, 1905, it won the first prize for best red. It was then sailing under the name of Grandiflora Rubra. About as big a red Peony as is grown. **75 cents.**

442—**MONSIEUR PAILLERT** (Guerin, 1857.) Crown type; midseason. Large, compact flowers, uniform violet-rose, silvery reflex, center shaded darker. Fragrant. Free bloomer. **75 cents.**

42—**PURPUREA SUPERBA** (Delachi, 1855.) Crown type; midseason. Large, fine formed flowers. Color deep carmine-rose, guards streaked white, light green carpels; stigmas pink. Very tall, free bloomer. As fine a flower in every way as Rubra Superba. **75 cents.**

26—**SOUVENIR DE L'EXPOSITION UNIVERSELLE** (Calot, 1867.) Rose type; late midseason. Very large, flat flower of violet-rose with silvery reflex and distinctly tipped silver; fragrant; free bloomer, with spreading habit. **75 cents.**

485—**TENIERS** (Crousse, 1880.) Semi-rose type; late, midseason. Flower, imbricated and tufted, violaceous amaranth, bordered and reflected Chatoyant white. Very showy plant. **75 cents.**

THE LINCOLN COLLECTION

You will want this collection for the name alone. They are the robust, irresistible, determined growers you have been trying to procure.

30—**FESTIVA MAXIMA** (Mieliez, 1851.) Rose type; early. This is not only the finest white in existence, but many regard it as the queen of all the Peonies. Mr. Harrison says: "This flower has reached the ultimate beyond which we cannot go. Here at the door stands Festiva Maxima, white as the soul of the Madonna, with now and then a blood drop, as though the iron had sometimes entered her heart. What a marvelous flower!" It combines enormous size with wondrous beauty; often seven to eight inches in diameter. Clear carmine spots on edge of center petals. For over sixty years it has held first rank, and is still the standard of perfection by which all other Peonies are judged. The most popular white Peony for cut flowers. June rose fragrance. **75 cents.**

38—**FRAGRANS** (Sir Joseph Banks, 1805.) Bomb type; very late. Compact, full flowers; color solferino-red with slight silvery reflex; strong, vigorous grower, making shapely plants; free bloomer in clusters; an old favorite and extensively grown for cut flowers. **75 cents.**

THE LINCOLN COLLECTION---Concluded

- 174—**CHARLES TOCHE** (Dessert, 1888.) Semi-double type. Early. Clear purple with carmine reflex. Double crown of petals varying from tender pink to ruby, separated by a row of gold stamens of which the center is equally adorned and which gives a great elegance to this variety; a very showy plant. **75 cents.**
- 101—**MADAME DUCEL** (Mehin, 1880.) Bomb type; midseason. A very large, wonderfully built flower; broad guard petals; center bomb shaped like a huge ball; very double and compact. The closely set central petals are beautifully incurved as in a *Chrysanthemum*. The whole flower, both guards and bomb, a solid color of silvery-lilac-pink or mauve rose, very distinct and floriferous; holds its form and color to the end. Indispensable. Stands among the very first Peonies. **75 cents.**
- 355—**COMTE DE NEIPPERG** (Verdier, 1854.) A fine even color of bright amaranthine-carmine. **75 cents.**
- 67—**GOLDEN HARVEST** (Rosenfeld, 1900.) Bomb type; midseason. A most striking variety producing large, tri-colored bloom. The guard petals are blush-pink with creamy-white center; center of flower overlaid and tipped with carmine. It combines cream, gold, white, pink, salmon, peach and apricot, the total color effect of the flower being creamy-pink; strong, delicate fragrance. Mr. Harrison says: "It breaks out into a wild, rollicking prodigality of beauty with its large flowers as to almost smother the plant so great is their profusion. We all take off our hats as they pass by and cheer for beauty." The variety Jeanne d'Arc is identical with Golden Harvest. **75 cents.**
- 197—**MADAME DE VATRY** (Guerin, 1863.) Crown type; midseason. Very large, finely formed bloom. Lilac-white guards and crown, sulphur-white collar of wide petals, center striped carmine. Splendid cut flower variety and a fine bedding sort; fragrant. One of Mr. Ward Welsh's favorites. **75 cents.**
- 46—**JENNY LIND** (Barr, 1860.) Bomb type; midseason. Large bloom on long stems; tall grower; free bloomer; color light pink with silvery reflex with narrow white petals interspersed with the center petalage. A most striking variety and one that has many admirers. **75 cents.**
- 52—**DOCTOR CAILLOT** (Verdier, 1856.) Semi-rose type; midseason. A grand flower, coming in large clusters; rich, fiery amaranthine-red. We doubt if there is a finer general purpose red. It will surprise you. Very free bloomer. **75 cents.**
- 313—**TRIUMPH DU NORD** (Mieliez, 1850.) Bomb type; midseason. Light carnation-pink, much the shade of *Enchantress* Carnation. Fragrant. **75 cents.**
- 257—**UMBELLATA ROSEA** (Dessert, 1895.) Rose type; very early. A variety found by M. Dessert in M. Mechin's collection without name and christened Sarah Bernhard until later he found the true name. Large informal flower, guards violet-rose shading to an amber-white center. Very strong, upright grower and free bloomer. **75 cents.**
- 172—**ZOE CALOT** (Mieliez, 1855.) Rose type; midseason. Very large, globular bloom. Color soft pink shaded lilac. Free bloomer. **75 cents.**

Color milk-white, with sulphur center, both guards and center prominently flecked crimson. Erect, tall grower; fine cut flower variety; follows *Festiva Maxima* and is often sold for that variety. Opens light pearl or shell-pink, finishing delicate blush or lilac white with an occasional creamy-white spot. Flower in its make-up and color somewhat resembles an immense *Carnation*. Foliage crimped like the foliage of an *Ardisia*. Fragrant. Excellent for all purposes. **75 cents.**

- 270—**LA COQUETTE** (Guerin, 1861.) Crown type; midseason. Opens flat and builds up into a crown of pyramidal shape. The guards are wide of bright rose-pink, then a fringe of narrow petals of a lighter shade of pink than the guards, these surmounted by a crown of wide rose-pink petals same color as guards; these again followed by a border of cream-white petals, the whole finishing with a prominent tuft of rose-pink. Certainly a coquette. **75 cents.**
- 23—**AUGUSTE LEMONIER** (Calot, 1865.) Anemone type; midseason. Superb brilliant red with velvety finish; fragrant. - 236—**ALFRED DE MUSSET** (Crousse, 1885.) Rose type. Late. Fine shaped flower of fleshy white shaded subdued salmon, flecked crimson, with rose center. Extra. **\$1.50.**

- 276—**MARGUERITE GERARD** (Crousse, 1892.) Semi-rose type; midseason. Enormous, flat-shaped flower with broad petals blooming in clusters; color delicate Hydrangea-pink, changing as the flower ages to creamy-white. Many of the central petals and even the guards have minute dark carmine, almost black, flecks on the tips; fragrant. What can we say of this imposing wonderful flower? Visitors to our fields pause in astonishment before our rows of this variety. It looks at you from any position or angle at which you may stand, and seems to say, "Did you ever see a flower so sensational or beauty so radiant? Verily, Solomon in all his glory was not arrayed like one of these." **\$1.50.**
- 237—**COQUELIN** (Dessert, 1905.) Semi-double type; early. Large, glorious bloom of perfect cup-shaped form, petals imbricated, bright tyrian-rose becoming distinctly silver tipped. Very rare. **\$1.50.**

- 493—**VICTOR HUGO** (Crousse, 1885.) Bomb type; late midseason. Brilliant dazzling ruby-red. Exceptionally fiery and crimson. Mr. Dessert says this variety is identical with Felix Crousse. **\$1.50.**
- 48—**MONSIEUR JULES ELIE** (Crousse, 1888.) Bomb type; early midseason. This is the king of all Peonies, and is without question M. Crousse's masterpiece. Immense globular, very full flowers. Color an ideal glossy lilac-pink, shading to deeper rose at the base, the entire flower overlaid with a sheen of silver that fairly shimmers in the sunlight. Monsieur Jules Elie is claimed by many to be the largest of all Peony flowers. On young, vigorous plants we have had flowers eight and nine inches through. In fact they are so large and handsome that but few can realize they are Peony blooms on first seeing them. An unapproachable variety from any standpoint. When cut in the bud, a good keeper, thus fine for cut flowers. Our planting comprises some twenty thousand plants of this grand Peony. Easily scores the six points of excellence. "Visitors at the Boston show last year will remember that a mammoth or rather mastodontic bloom of the same variety drew the first place there, too, and in this year's show at Boston, both first and second premiums fell to the same sort." **\$1.50.**

- 161—**MADAME DE BOLLEMONT** (Crousse, 1892.) Rose type; late midseason. Large, very full, double convex flowers with closely set petals, soft violaceous glossy pink with silvery border. **\$1.50.**
- 149—**LA ROSIERE** (Crousse, 1888.) Semi-double type; midseason. Large flowers in huge clusters usually of five flowers on a stem; all flowers open at one and the same time; thus a single stem makes a huge bouquet in itself. The flowers consist of several rows of large, pure white petals, the center of the flower being a large disc of golden-yellow stamens, resembling a huge chalice of molten gold. The effect of the white and gold in such handsome form is both startling and entrancing. In form and effect resembles an enormous tea rose. One of the very choicest. **\$1.50.**

Dessert, in his manuscript on the Peony, says: "Doctor Boisduval (Guerin) is like Delachei." If this is true, then Dr. Boisduval claims precedence, it being sent out in 1850, while Delachei was not disseminated until 1856. \$1.50.

THE TAFT COLLECTION

This collection includes some of the wonderful creations of recent introduction. Should you not care for all, at least try some of them, and you will thank us for our recommendation.

- 91—**BLANCHE DESSERT** (Dessert, 1888.) Semi-rose type; very early. Silvery soft pink. Very brilliant; petals intermixed with golden stamens. Extra. \$2.00.
- 534—**BEN FRANKLIN** (Brand, 1907.) Rose type; early midseason. A brilliant crimson with ruby shadings at base of petals. Very tall erect stems, carrying individual blossoms in great profusion. Fragrance slight but agreeable. The flowers unfold slowly and carry their form and color much longer than most red varieties. A single plant or a group on the lawn or a vase filled with these gorgeous blossoms always attract attention and calls forth exclamations of delight and admiration. It is a charmer and will give satisfaction. \$2.00.
- 279—**BARONESS SCHROEDER** (Kelway, 1889.) Immense size, forming a huge pyramid of baby pink, changing to pure white; extra fine. \$2.00.
- 425—**MADAME MOREAU** (Crousse, 1888.) Anemone type; midseason. Large convex bloom. Very fresh pink with tips of petals bordered with silver. Center a bright rose. Beautiful. Extra. \$2.00.
- 80—**GRANDIFLORA** (Richardson, 1883.) Its immense double flowers are borne in greatest profusion. Color bright sea-shell pink overlaid with delicate lilac and salmon-pink. So fairy like it reminds one for all the world of huge butterflies hovering over the plants. It is a wonder. \$2.00.
- 380—**GEORGE WASHINGTON** (Hollis, 1904.) Semi-rose type; midseason. Large, flat flower, uniform dark crimson; tall. Certificate. \$2.00.
- 107—**MILES STANDISH** (Hollis, 1904.) Rose type; late midseason. Globular form, compact and full. Very rich dark crimson; free bloomer. \$2.00.
- 36—**PRESIDENT TAFT** (Blaauw & Co., 1909.) Rose type; midseason. Originated on a private estate in France, bought and taken to Holland and given the Dutch name "Frankryh," which, being interpreted, is "La France," but before being disseminated or any of it sold, the name was changed to President Taft as a compliment to their American customers, and also for the further reason, no doubt, of aiding in the sale of the variety. Mr. Ward Welsh, in charge of our Peony fields, says: "President Taft combines so many of the good qualities necessary to a first class Peony, and combines these qualities in such a superlative degree that I have no hesitancy in saying this variety stands at the head of all Peonies. A vigorous, strong grower, a profuse bloomer, every shoot being crowned by a big bloom. The flower is really of enormous size; there may be Peony flowers as large, but none larger. The color is a delicate Hydrangea-pink, completely enveloped in a halo of angelic white. The fragrance is delicious." It is certainly a glorious, gorgeous flower, very large and double. The only Peony we know that has stripes on the face of the flower. La Tulipe has stripes on the reverse of the petals. President Taft is a marvelous flower, both distinct and beautiful. No other just like it. In some quarters in Holland it is claimed that Rene Hortense is the same Peony. All we have to say is that if that is true then a lot of Peony "ginks" have been overlooking a big, juicy bet for years past, and the Peony world should all take off their hats and cheer for Blaauw for the discovery. \$2.00.
- 479—**SAINFOIN** (Kelway, 1890.) Rose type. The most striking of all the flowers. Very full, large and brilliantly self-rose color. First-class certificate R. B. S.; also Award of Merit, R. H. S. \$2.00.
- 788—**ROSSINI** (Kelway.) Semi-rose type; early midseason. Uniform deep tryan-rose tipped silver, changing to cherry-rose. \$2.00.
- 552—**WILLIAM PENN** (Brand, 1907.) Semi-rose type; midseason. Color light rose changing to a more delicate rose at edge of petals. Edge of petals notched. Lavish bloomer. Blooms are of such gigantic size that the strong stems need support. Flowers of wondrous beauty and the most massive of all good Peonies. \$2.00.
- 103—**LA TULIPE** (Calot, 1872.) Enormous flowers, delicate blush-white, with pronounced stripes of carmine both on the face of the flower and on the bud before opening. Considered by all as a very choice variety; remains in bloom full two weeks. \$2.00.

The Best Way To Grow Bulbs Indoors

PLANT HYACINTHS in sandy soil, or make the soil porous with leaf mould secured from the woods. Plant the bulb bottom down, and push the bulb tight in the soil so that the top of the bulb is even with top soil. Use old four or five-inch pots—never new pots if you can avoid it. There are shallow, wide pots, made to hold three or more bulbs; they are satisfactory to plant in where only one variety is planted in a pot. Never feed the bulbs with manure—the power to flower is in the bulbs. A Hyacinth grown in water alone proves the truth of this. Give a good soaking after planting, and water once or twice a week if necessary during the time the bulb makes roots. Put the pots after planting—which should be done during September or October—in the ground, and cover the pot and all to the depth of three or four inches with soil. This is to prevent the roots from lifting the bulbs out of the pot. Or you can put them in the cellar where it is cool and dark. The idea is to have the bulbs kept cool and dark, so that the roots will start before the tops do. Cover up the ones outside with leaves or sawdust to the depth of six inches, as frost, if it reaches them, almost always results in injury to the flowers. After four weeks or so examine the roots, and see if they are down to the bottom of the pot; then bring the ones you want to flower early into a dark place where the temperature is from fifty to seventy, but keep them dark by covering them up or placing them in a dark cupboard. They can be left outdoors or in the cellar if you do not want them so early, until the sprout is as long as a man's finger. This brings them in later, but is the surest way to get fine flowers, as it is more natural than to force them quickly. When the sprouts have reached the length of a man's finger they may be exposed to the light. If brought to the light sooner the result will be that the top bells will open first, and then the flower is spoiled, for the top bells will be faded before the lower bells open. The sprouts are yellow by keeping covered, but that does not matter, as they turn green quickly when brought to the light.

Tulips and Narcissus are treated the same as Hyacinths, except that when brought in from outdoors or the cellar they can be placed in the full light at once. Instead of pots you can use grape baskets.

DEPTH AND DISTANCE APART TO PLANT THE DIFFERENT VARIETIES OF BULBS:

Plant Hyacinths 5 inches deep and 7 inches apart for bedding.
Plant Tulips 4 inches deep and 5 inches apart for bedding.
Plant Crocus 2 inches deep and 2 inches apart for bedding.

Plant Narcissus 4 inches deep and 12 inches apart for bedding.
Plant Jonquils 3 inches deep and 6 inches apart for bedding.
Plant Lillies 5 inches deep and 14 inches apart for bedding.

General Collection of Single Hyacinths

Our patrons can rely on the Hyacinths in this list as being the very best of their colors. We have tested varieties from year to year and can guarantee satisfaction in any of the following kinds. You cannot possibly go amiss in your selection of any of them. These varieties are equally good for planting outdoors or for forcing in the house in winter. Price 15 cents each; \$1.50 per dozen.

ANGENIS CHRISTINA—Immaculate white; extra fine.

AVALANCHE ("White Baron Von Thuyl")—Pure white.

BARON VON THUYL—A grand shade of deep blue.

CARDINAL WISEMAN—If there is one Hyacinth that will instantly attract attention, it is this one. A beautiful silvery-rose color.

CHARLES DICKENS—A grand shade of bright blue.

ETNA—Brilliant rose striped carmine; superb.

GENERAL PELLISSIER—Deep scarlet, early, good.

GENERAL DE WET—This is known in Holland as the "Pink Grand Master." It certainly is a most wondrous beautiful bright shade of silvery-pink.

GERTRUDE—This is the freest-flowering of all the Hyacinths; often has two to four spikes of bloom; a lovely deep rosy-pink color.

GIGANTEA—Immense truss of bright rose-colored flowers.

GRAND BLANCHE—A beautiful delicate blush.

GRAND LILAS—Immense spikes and mammoth florets. Probably the largest of all Hyacinths, and is another of those delicate blues, the color that daily entrances you. A variety that is deservedly popular everywhere. Superb.

JACQUES (Queen of the Pinks)—New, beautiful silvery-rose with satin sheen.

L'INNOCENCE—A lovely shade of creamy-white. This is one of the new varieties and takes rank in Holland among the ten best varieties. It sometimes comes with very delicate tracings of pink that set off its charms to great advantage. Superb.

MADAME VAN DER HOOP—Pure white; planted by the thousands for its superior trusses of snow-white flowers.

MARY—Dark rich royal-purple; a superior Hyacinth.

MORENO—This is said by all who have seen it to be the very best waxy pink Hyacinth yet offered. The florets are extra large, spikes solid and compact and of immense size, and the fragrance is delicious. The color is very distinct; elegant.

MR. PLIMSOLL—This is a very attractive Hyacinth, bearing immense spikes of pure white with a delicate blush.

PINK BEAUTY (Lord Balfour)—Large, tall spike, very shapely bells of the largest size. This well deserves the name of Pink Beauty, as it is the finest of all pink Hyacinths. Extra.

ROSEA MAXIMA (Marconi)—A grand large truss of deep rose; some would call it a red.

WILLIAM I.—Beautiful purplish-black; a grand variety. Early.

YELLOW HAMMER—Deep golden-yellow. A very refined and chaste color.

Choice Collection of Fancy Single Hyacinths

In this collection we place all the high-priced varieties. There is such a demand for them in Europe, where they are well acquainted with the good sorts, that the demand exceeds the supply, and they are always scarce and hard to get. When you have the following twelve Hyacinths in your possession, you have the very best that money can buy. They are every one gems of the first water. Price 15 cents each; \$1.50 per dozen.

In ordering, say "Fancy" Collection of Hyacinths. They are the largest, the most delicately colored and the most fragrant of all Hyacinths.

BIRD OF PARADISE (City of Harlem)—The spike is the largest of all yellow Hyacinths. The color is a rich deep golden-yellow. Very pure. No other yellow Hyacinth approaches it in either color or size.

CZAR PETER—This is without question the finest of all light blue Hyacinths. The truss is very large and solid. The color is a delicate sky-blue. This Hyacinth is admired more than any other variety of any color in Holland. Simply grand.

ENCHANTRESS—Do not forget that the porcelain-blue color in Hyacinths is the most admired and in greatest demand. This is a delicate porcelain-blue color. Extra fine.

GRAND MAITRE ("Grand Master")—Deep porcelain-blue; one of the grandest of all blue Hyacinths. Much prized in Holland.

KING OF THE BELGIANS ("Roi des Belges")—So many persons complain that they never get a bright red Hyacinth. The color of this grand variety is a rich, glossy ruby-red of the brightest hue. Certainly a gem.

KING OF THE BLUES—This is the richest and most elegant of the dark blue Hyacinths; it is so dark that the texture of the flower seems covered with a rich sheen of velvet almost black. Exquisite.

KING OF THE YELLOWS—A very pure yellow color, one of the richest and best; none better.

LADY DERBY—This is said by all who have seen it to be the best dark rose-colored Hyacinth yet offered. The florets are extra large. Spike solid and compact and of immense size, and the fragrance is delicious. The color is a rich, deep rose, very bright and distinct. Elegant.

LA GRANDESE—This variety deserves the name of Grandesse. Splendid, immense spikes of large pure ivory bells, waxy in appearance, vying with the snow in purity, while its fragrance is delicious, yet penetrating. Simply exquisite. The best of all whites. Extra fine. Immaculate in color.

LA VICTOIRE—This is a bright red Hyacinth of the greatest merit. The color is a rich, even shade of bright red. Superb.

QUEEN OF THE BLUES—In Holland the delicate blue Hyacinths take precedence over all other colors, and the blue varieties in this collection cost much more than any other color. With Czar Peter this variety is a sure enough rival. It does not conflict with any of the other blues in this collection, being entirely distinct, a delicate porcelain-blue, a color that is extremely rare in flowers of any kind. Extra fine.

SIR WILLIAM MANSFIELD—This is the rare color in Hyacinths, being a most beautiful shade of lilac or violet. When you see this in flower you will always remember it.

REMEMBER That the Foregoing Twelve Hyacinths are the Best Singles in Cultivation. Get Them and You Will Have the Best.

Five Beautiful Roman Hyacinths

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early winter blooming. They are among the few flowers which can be had as early as Christmas and New Years. Each bulb throws up several spikes of flowers, which are very beautiful and fragrant, and when kept in a cool room will keep perfectly for weeks. Three can be planted in a four or five-inch pot, and will soon be in flower. In the garden they are the first of all Hyacinths to bloom. We offer extra large bulbs. The new double ones are exceedingly fine. Do not fail to plant a good lot of them for winter. **Price 10 cents each; \$1.00 per dozen.**

BLUE—Lovely light blue, a fine contrast to the white variety.

CANARY YELLOW—Few novelties have come out recently which will in importance surpass this new yellow Roman Hyacinth. There is nothing to be said of it except it is like the common Roman white, except in color, which is a lovely shade of light yellow.

PINK—A grand new sort with enormous bright deep bells in large spikes.

RED—A beautiful shade of deep red, very bright and penetrating.

WHITE—Has elegant waxy-like bells of great beauty and fragrance.

Mixed Hyacinths---For Bedding Out in the Fall

These Mixed Hyacinths are used almost exclusively for bedding out in the fall on account of their cheapness. They are just as good colors and just as fragrant as the named varieties; the difference is in the cost of keeping the named sorts separate, both while planting and after they are dug. The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying. **Price 12 cents each; \$1.25 per dozen.**

EARLY FLOWERING DOUBLE TULIPS

These Tulips have massive flowers of brilliant and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties, and in consequence when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts do splendidly when grown in pots for winter blooming, but must be forced much slower than Single Early Tulips, by keeping them cooler. Those preceded with a star are the best varieties for forcing indoors.

EARLY FLOWERING SINGLE TULIPS

Those marked with a star are the best for forcing in the house, but all Tulips are fine for garden culture.

Tulips are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted.

The Single Tulip has a greater variety of rich, delicate and attractive colors than any other selection of spring flowering bulbs. The Single Tulip is extensively grown for indoor decorations three or five bulbs in a pot.

DARWIN TULIPS

Long Stemmed LATE FLOWERING

A new family of Tulips of stately, noble and dignified character. Too much cannot be said in praise of this class of tulips. There is scarcely another spring-flowering bulb to rival Darwins. They excel in brilliancy of colors, perfect form of flowers and strong stems. For splendid effect in borders and planted in small groups amongst shrubs they are unsurpassed. As a cutflower, they are of great value. Grow three feet high, bearing immense large flowers, 3 to 4 inches in diameter. The most unique and richest colored of all the Tulip family. Their colorings vary from the light tints of white, lilac, rose and brown to deep violet, brilliant red, dark brown and black. Very late flowering.

Cottage or Mayflowering Tulips

(LATE FLOWERING SINGLE)

Old Dutch or Breeder Tulips

The Breeder Tulips are the unbroken forms of the old florists' Tulips. The blooms strongly resemble the Darwin Tulips, excepting that they have an entirely different range of color, comprising artistic tones of bronze, terra cotta, orange, and brown. Breeder Tulips are May-flowering, producing blooms of enormous size, and because they are vigorous growers are valuable for the garden. We have taken great pains to select only choicest varieties, and can heartily recommend these to anyone who wishes something especially fine.

Mixed Tulips

We have a large stock of unnamed Tulips for bedding, which we price so low as to make a large mass of these showy flowers a matter of a trifling expense. They are excellent bulbs, and will bear handsome blooms. Double and single collections are kept separate. Several hundred bulbs at the quotations below involve less expense than is required to secure a few summer bedding plants, and they are fully as valuable.

Superfine Mixture, Double Tulips—In fifty choicest kinds. Splendid flowers. 75 cents per doz.; \$5.00 per 100.

Tulips

Tulips should be put into the ground when the leaves begin to fall from deciduous trees. This is probably a better guide of the time of planting than any definite date would be, since climatic conditions vary so much.

After planting, a litter of leaves should be placed over the beds as soon as a thin crust of the ground is frozen. This cover should be removed early in the spring, before the Tulips have a chance to come through the ground.

DAFFODILS AND NARCISSUS

The Golden Daffodil, the earliest harbinger of the joy that is to come with the awakening of Mother Earth after her long winter's sleep, as Shakespeare says: "Daffodils—That comes before the swallows dare, and take the winds of March with beauty." Very free-flowering and suitable for window garden, conservatory or garden, continuing long in bloom. They have tall spikes of bloom, bearing six to twenty-four flowers each. The pure white petals and gold cup of some varieties, the yellow with the orange cup of others, and the self whites and yellows, render them great favorites.

Grows in water, like the old variety. 10 cents each; three for 25 cents; 75 cents per dozen.

Try a Dozen and Be Delighted.

The Chinese Sacred or Oriental Narcissus

A Variety of Polyanthus Narcissus.

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery white with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient customs to herald the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxurious growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. We are importing direct from China immense bulbs of the true large-flowering variety. Price, 25 cents each; three for 65 cents.

Narcissus Grand Monarque.

GRAND DUCHESS LAVENDER.

GRAND DUCHESS WHITE

GRAND DUCHESS PINK.

GRAND DUCHESS BOWELL (Red).

YELLOW (Buttercup) OXALIS.

CROCUS, That Bloom in the Spring

Crocuses, among the earliest and brightest of spring blooms, have been cultivated as far back as floral history goes. Winter is scarcely over when the rosy Crocus Imperati peeps from under the blanket of snow. The Crocus is one of the first flowers of spring, and one of the best for blooming in the house during the winter. Half a dozen bulbs may be planted in a pot, and will make a very pretty show. For garden culture plant bulbs two inches deep and two or three inches apart. They are so cheap and pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift their bright heads up through the sod very early, and give the lawn a charming aspect. The sorts we offer are especially strong and fine. Price, 4 cents each; 45 cents per dozen; \$3.25 per hundred.

Lilium Candidum

Lily of France or "Madonna Lily."

The old-fashioned pure white garden Lily, also known as Easter Lily, or Annunciation Lily. One of the hardiest. Flowers snow-white, with heavy yellow stamens and sweetest fragrance. Blooms in June and July. It bears from five to twenty blossoms. This is the most decided variety we have in expressing its preference for a planting time. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for spring sales, but never do quite so well. It should be planted in the fall. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. 40 cents each; three for \$1.00.

Our Bulbs reach this country about September 10th, so do not become impatient if your order does not reach you before September 15th, as it takes a few days to get the bulbs through the customs house. We will ship order as soon as bulbs reach us.

Lilium Giganteum

THE TRUE BERMUDA EASTER LILY.

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter, and other special occasions, make them invaluable. The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals during the winter. The quantity of bloom produced is marvelous. Blooming plants in pots form typical Easter offerings and presents, for decoration of window, table, house or church. As a garden Lily it is of great beauty, being entirely hardy except in Northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. Price, 40 cents each; three for \$1.00.

Winter-Blooming Freesias

PURITY—No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a

Winter Blooming Freesias.

large room without the overbearing perfumes of Hyacinths or Tuberoses. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window, and watered more as growth progresses. When out of flower, store in some place, and repeat at proper season in fresh soil for another year's growth. 5 cents each; 50 cents per dozen.

These bulbs make a wonderful house plant on account of their rich perfume.

It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. The "Excelsior" List of Ever-Blooming Roses New and Choice for Outdoor Planting or House Culture

Price, 20 cents each, except where noted; two-year Plants, 40 cents each, except where noted.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardy everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

BABY ECHO—The best Polyantha produced. Color rosy-flesh. Of splendid strong growth and freedom of bloom, which are of wonderful keeping qualities either on or off the plant. This is the improved Baby Tausendschoen. It has more substance and more color, and is the best of all Baby Roses for pot culture. Be sure and try this one.

BABY TAUSENDSCHOEN, or THOUSAND BEAUTIES—Its flowers are large, so much like Thousand Beauties, that it has been rechristened Baby Thousand Beauties. A splendid Rose. Try it.

EDITH CAVELL—Bright crimson; white eye; very beautiful. One of the best new Baby Roses.

ETOILE LUISANTE or BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which on account of the similarity in color has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense, coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. We are certain that Baby Herriot will please everyone.

GEORGE ELGER—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds

open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

GRUSS AN AACHEN—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

MADAME JULES GOUCHALT (Turbat 1913). (D. P.)—Buds bright vermillion-red, shaded clear orange-red; flowers same, passing to a bright, fiery rose which does not fade. Wood and foliage clear green, producing long, erect panicles of twenty-five to fifty perfectly formed blooms of good keeping qualities. Award of Merit and Silver Gilt Medal, R. H. S., and Gold Medal Paris.

MLLE. FRANCISQUE FAVRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowering in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

ORLEANS—The showiest and prettiest of all the Baby Ramblers This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. Color is irresistible. Plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. Awarded gold medal.

TIP TOP ("Baby Doll")—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed a deep glossy green—a very beautiful setting for the lovely little doll roses, a bench of "Baby Doll" being an even parterre of delicious color.

Dwarf Polyantha, or Baby Roses

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay. They are useful either pot grown or for bedding purposes or for hedge effect. 20 cents each; six for \$1.00; two-year plants, 50 cents each; three for \$1.25.

ERNA TESCHENDORFF—Deep crimson flushed with carmine; very dark.

JESSIE—Bright cherry-crimson. Superb.

LE POCHEAU—Dark red in large clusters.

MADemoiselle CECILE BRUNNER—This is the popular Baby Pink Rose. It is also known as Sweetheart and Mignon.

In the past year or two this Rose has fairly jumped into popularity. It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds and combined in beautiful effect with so many other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in the winter should be a money-maker, both outdoors and under glass. The bud and flower are both handsome. Color, bluish, shaded light salmon-pink; distinct and desirable.

MRS. WM. H. CUTBUSH—Flowers the delicate pink of Dorothy Perkins.

PERLE d'OR—Coppery-orange, changing to fawn.

HELEN GOOD (The Beauty Cochet)—What the introducers say: "This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying \$1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow suffused with pink, each petal edged deeper, very chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out."

KAISERIN AUGUSTA VICTORIA—A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers.

"FAMOUS" Rose Collection For Garden Planting---Concluded

MAMAN COCHET (The Queen of all Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As we see it, one good Rose like any of the Cochet Roses is worth a whole collection of poor ones.

PRESIDENT TAFT (McCullough, 1908.)—This Rose was raised in Cincinnati, the home of President Taft, and let us say right here, while some of you may not admire the President himself, you will, one and all, admire the Rose given his name. It is without question the most remarkable of all pink roses. It has shining, intense, deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant and in a class by itself as to color. Our Mr. Frank Good, who is

probably familiar with more Roses than any man in America says: "Talk all you want to about the Rose President Taft, and then you will not say enough."

RADIANCE (Cook, 1909.)—A brilliant rosy-carmine, displaying beautiful rich and opaline-pink tints in the open flower. The form is fine, largest size and full, with cupped petals. It blooms constantly and is delightfully fragrant. This is a superior Rose.

WHITE MAMAN COCHET (No Finer Rose Than This)—This Rose attracted our attention from the very first time we ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, or rounded and very double. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in the immense size of its buds and flowers—indeed, nothing in the Tea family approaches it in size. Deliciously fragrant.

WM. R. SMITH—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

ALIDA LOVETT—Both buds and flowers are large, are of ideal form, are held on stiff stems a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of petals—a combination that is both novel and beautiful. The flowers are of remarkable substance and long lived, whether cut or left to remain upon the plant, and are pleasantly perfumed. It is very much brighter and more cheerful in color with larger flowers than those of the justly popular Dr. Van Fleet Rose. 35 cents; two-year plants, 75 cents.

RED DOROTHY PERKINS, or EXCELSA—The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon the tips of the petals tinged with scarlet. The finest of all red Climbing Roses. 25 cents; two-year plants, 50 cents.

Mixed Primulinus Hybrids

These hybrids, gained by crossing the species *Primulinus* with the larger varieties of the *Gandavensis* type, have retained all the daintiness and graceful form of their *Primulinus* parent, even to the "hood" formed by the drooping of the upper petal, and have an added beauty of exquisite coloring, from the softest primrose to a beautiful rose. Each, 6 cents; dozen, 60 cents; hundred, \$4.70.

Gladioli in Mixture

Persons who do not plant mixtures—no matter how many of the named kinds they plant—will miss much of the pleasure of this grand flower. In colors every magnificent and gorgeous combination conceivable is represented. The richest of self-colors, blotched, etc.; the finest white and pastels of every tint and color. Each, 6 cents; dozen, 60 cents; hundred, \$4.70; thousand, \$40.00.

BEAUTIFUL HOUSE FERNS

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Everyone of these *Nephrolepis* Ferns is entirely distinct in every way. That we are headquarters for Ferns is evidenced by the choice assortment that we offer. No other firm offers so many distinct and choice varieties. Try us for Ferns.

The "Teddy Junior Fern"

Nephrolepis Teddy Junior.

"Teddy Junior," the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. Fine young plants, 25 cents; strong plants, 75 cents.

The "Roosevelt Fern"

Nephrolepis Roosevelt

It is our good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons: it produces many more fronds than the Boston, thus making a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the "Roosevelt" a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. Fine young plants, 25 cents each; strong plants, 75 cents.

New Fern "Liberty"

This is our own production. In the past we have sent out Baby's Breath, Teddy Junior and Roosevelt, the three greatest Ferns today, acknowledged so by all plantsmen and flower lovers, and now we add another one to the galaxy, "Liberty," no doubt the best of them. All the fronds have finely divided pinnae that give them a very beautiful appearance, while the whole plant is overlaid with a bluish cast that makes of it a very striking object. Wonderfully beautiful, different from all other Ferns. First time offered. Fine young plants, 35 cents each; strong plants, \$1.00 each. Be sure and try this beautiful Fern.

The "Big Four" Fern

Nephrolepis Splendida

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of a "Fish Tail." Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of "Big Four Fern." Everyone who sees it goes "daffy" about it. This is without question the most splendid of all the *Nephrolepis*. Be sure and try it. Fine young plants, 25 cents each; strong plants, 75 cents.

BEAUTIFUL HOUSE-FERNS---Concluded

The "Wannamaker Fern"

Nephrolepis John Wannamaker

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Scholzei, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. **Fine young plants, 30 cents; strong plants, 75 cents.**

The "Ostrich Plume Fern"

Nephrolepis Whitmanii

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it **the most valuable novelty that has been introduced in many, many years.**" It has taken gold medals wherever shown. **Fine young plants, 35 cents; strong plants, 85 cents.**

The "Baby's Breath Fern"

Nephrolepis Goodii

This Fern is splendid to use for Fern Dish Planting. It has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well grown specimens in any size. **Fine young plants, 50 cents; strong plants, \$1.00.**

The "Newport Fern"

Nephrolepis Scotti

Of much dwarfer and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a 14-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Fine young plants, 30 cents; strong plants, 75 cents.**

The "Parlor Fern"

Nephrolepis Whitmanii Compacta

This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. **Fine young plants, 35 cents; strong plants, 75 cents.**

The "Philadelphia Lace Fern"

Nephrolepis Elegantissima

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds the side pinnae stand at right angles to them **ID-SPECIAL OFFER—The Fifteen Beautiful Ferns as named, plants, costing \$10.10, for only \$9.00.**

rib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from the description. **Fine young plants, 35 cents; strong plants, 75 cents.**

Fern Smithii

A new type of the Ostrich Plume family. The frond is very compact and the pinnae are finely serrated, giving it the appearance of a strong feathery plume. **Fine young plants, 50 cents each.** No large size to offer.

The "Old Original Sword Fern"

Nephrolepis Exaltata

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the Nephrolepis we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. **Fine young plants, 25 cents; strong plants, 75 cents.**

The "Crested Fern"

Nephrolepis Scholzei.

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or yellow. **Fine young plants, 25 cents each; large plants, 50 cents.**

The "Boston Fern"

Nephrolepis Bostoniensis.

In the vicinity of Boston, no other plant is so extensively used as this graceful Nephrolepis, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth. **Fine young plants, 25 cents; strong plants, 75 cents.**

The "Fluffy Ruffles Fern"

Nephrolepis Superbissima

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and its irregular shaped fronds, which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit. **Fine young plants, 75 cents.** No large size to offer.

costing \$5.25, for only \$4.25. The Thirteen Ferns in strong plants, costing \$10.10, for only \$9.00.

CARNATIONS The Divine Flower PINKS

Every flower, like every human soul, expresses some unique quality. The lily is loved for its modesty, and the carnation for its "odor divine." Plants in pots quickly make large specimens. They produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive; don't buy them—grow them yourself. Plant in a four or five-inch pot, keep in a temperature of forty or fifty degrees at night, and they will yield an immense number of flowers with splendid stems, as fine as those sold by florists. **We offer an assortment of the three best colors in existence, red, pink and white, in good field-grown plants. 35 cents each; 3 for \$1.00.** Your order is incomplete without some Carnations.

Wonderful New Lemon, Ponderosa

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful lemon has. It is a true ever-bearing variety. On a plant six feet high no less than 89 of the Ponderosa Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and even at the same time had fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. It is not uncommon to make twelve lemon lies from one lemon. We have the entire stock of this ponderosa lemon and guarantee the trees to produce the same large fruit. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. Everybody can grow his own lemons; it will fruit freely each year. **Thrifty young plants 25 cents each. Larger plants, 50 cents. HARDY DECIDUOUS SHRUBS

Whether planted individually or collectively Shrubs are an important feature in the adornment of any yard. The rich green of the summer foliage plays a greater part in landscape effect than is often realized. Would advise planting liberally of Shrubs.

Our Shrubs will not be ready for delivery until the first part of November. When your order is received for same, it is placed on file for November delivery. If the weather is not suitable for planting in November, we then file your order until suitable time, early in the spring. If this arrangement does not meet with your approval, let us hear from you, so there will be no controversy over your order. No Shrubs will be shipped before November 1st.

The Ever-Blooming Butterfly Bush

Buddleya Variabilis Magnifica (Butterfly Bush).

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was among them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vieing with it in brilliancy of color. This shrub from a young plant set out either in the spring of fall, will mature to full size the first summer, producing a handsome bush which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. **Fine plants, 25 cents. Strong plants, 50 cents each.**

Buxus

(Ornamental Box.)

(*Sempervirens*)—Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the *Sempervirens Nana*, but we find it so much more vigorous and hardy that we advise planting this and trimming to height required. Fine for individual plants can be trimmed into any shape desired. **20 cents each; \$2.00 per dozen; \$15.00 per hundred, by express at your expense.**

Calycanthus Floridus

(*Carolina Allspice* or Sweet Scented Shrub.)

Their fine habit, luxuriant foliage and profusion of bloom render them among the most beautiful of shrubs. They flower the latter part of June.

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. Blooms profusely from July until frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back each spring fully one-half of the past season's growth, as the flowers are much finer if the plant is treated in this manner. The flowers are much finer and larger if grown in a good, rich soil, but the plant is so hardy and so easily grown that success is almost certain in any kind of soil and in any situation. **Strong flowering plants, for immediate effect, two years old, 75 cents.**

FALL PLANTING OF SHRUBS AND PERENNIALS

Many people prefer to do their planting in the fall season, and for very good reasons. In the first place, there are four months in which to work, in most localities, as compared to about two months in the spring. Then, for perennials and evergreens, there is the advantage of the fall rains, to establish roots so that they are ready to spring into growth the moment that winter retreats. Deciduous trees and shrubs also benefit in being firmly established in their new places, with the moisture from spring thaws and early rains to start them off—this same moisture making early spring planting impracticable.

It takes time to achieve a picture like this. Don't lose this fall season

Dahlias and Gladiolus, of course, are taken from the ground in the fall and stored for spring planting. Some deciduous plants, such as Tulip Tree, Magnolia, Horse Chestnut and Blue Ash, are best planted in the spring, in northern states, on account of their susceptibility to winter-killing when newly-planted; although thorough

protection by mulching and wrapping will make fall planting reasonably safe.

Peonies, together with fall bulbs such as Tulips and Narcissus, **must** be planted in the fall. Lily bulbs and Iris need fall planting. They start poorly from a spring planting.

Perennials and evergreens can be planted **this month**. Deciduous trees and shrubs can be planted next month, and to some extent in the latter part of this month.

The wood should be ripened and the leaves off first.

Are you going to furnish your outdoor rooms, or are you content to let your home be pent up within the four vertical walls of a house? You

can move furnishings into a house and that's that! But the out-door part of your home is furnished with living things that must **grow** a while before a finished effect is obtained. **Time** is the greatest factor in planting. You can buy part of this necessary factor when you order large plants, but you can never furnish your outdoor rooms complete, overnight, as you can furnish rooms inside of a house.

Start now, even if you can't do all that your place needs this season.

LANDSCAPE USES OF THE PEONY

In all manner of landscape development, be it for tiny cottage home or splendid mansion, there are three herbaceous perennials that are consistently planted—Iris, Peony and Phlox; and from the point of view of season of bloom, magnificence, and durable foliage, the Peony and Phlox perhaps stand pre-eminent, as the Peony and Iris bloom so nearly at the same time, while the Peony unquestionably displays a more gorgeous mass of bloom and more lasting greenery than the Iris, and the Phlox glorifies a later period in the season.

No herbaceous perennial holds a garden together better than the Peony, whether in bloom or not. It is early out of the ground in the spring, and as soon as the leaves are fairly unfolded, it assumes the role of a keystone in the garden, accenting or "holding up" important corners, sides and interior spaces in the beds and borders. When the Peony blooms, it dominates the garden, and no other flower can serve as a foil to set off its beauties. Green foliage fills this requirement, and the Peony is independent in this respect. It can be said, however, that evergreens really increase the effectiveness of Peonies, when used as a background for them. In localities where Rhododendrons are out of the question, Peonies in combination with evergreens make a very effective showing to suggest the groups of Rhododendrons and conifers found in the eastern states.

Peonies are effective in rows, masses, and as single specimens. Of course, the greatest showing is made by numbers of plants grouped together. Wonderful displays are possible in long borders or mass planting. A delicate gradation of color from ivory white through shades of pink and rose to a deep, dark red extreme can be selected from the long list of varieties grown today; and it is possible to work out a succession of bloom in any color that will last for three to four weeks. Many Peony lovers favor a hedgerow, or a border along a walk, of one particularly fine variety of their choice.

Single specimens are best used as accents

Peonies hold the garden together whether in bloom or not

in gardens or borders. Although one bush by itself is a lovely thing, it is better not to plant single specimens in open lawn areas in front of houses. It increases the detail of maintenance, as in mowing the lawn, and really adds nothing to the effectiveness of the plant in bloom. Peonies often take the place of shrubs against the house where space is narrow and a low height is desired, there being few really hardy shrubs of low height. Single specimens are often desirable for cemetery use, where space prohibits spreading shrubs. There is nothing more eminently satisfactory and desirable than a lovely Peony to bloom over a grave, and one knows that it will keep on coming up and flowering year after year. The pink and rose shades, with their foils of greenery, look especially well against the gray and white of stone markers and monuments. If planted near to these, they make little trouble in maintenance work. Varieties may be selected which will be in bloom on Memorial Day.

Peonies make wonderful cut-flowers. They are a favorite subject for garden shows in June, and much pleasure may be had in friendly neighborhood rivalry in producing fine blooms, and harmonious groupings both in beds and in cut-flower arrangements.

Don't plant Peonies in shaded places. Give them good, fertile, well-drained soil. Feed them by mulching between, but not over them, with manure in winter. Liquid manure applied once or twice a week to the ground around the roots, or a pinch of sodium nitrate sprinkled just around the

FALL BULBS

There is something fascinating about the planting of bulbs, that no other activity of gardening seems to possess. Rich and poor, amateur and professional garden devotees look forward to the mellow autumn days when they may, with trowel or dibble, plant Tulips, Narcissi. Hyacinths and the like, and then endure the long winter, fortified by anticipation of the gay flowers that catch and intensify the pale sunlight of early spring, while winter grudgingly gives way.

We have named Tulips, Hyacinths and Narcissi particularly because they are most in demand, for very good reasons. They grow more luxuriantly and make a better show of flowers than any other bulbs, and are most consistently easy to grow. Crocuses makes a pleasant showing, and is very early, but does not equal the three named.

Tulips and Narcissi offer more possibilities or use than do Hyacinths. Somehow the Hyacinth seems to belong principally to formal beds and borders; on the other hand, Tulips and Narcissi may be used either in formal gardens or naturalistic effects. The Tulip, especially, is equally at home in beds or in informal borders. The Narcissus seems most effective in informal borders or naturalized colonies sim-

ilar to those of wild flowers. There is nothing lovelier in early spring than an underplanting of Narcissus colonies in a woodland area, especially in combination with Mertensia (Bluebell.) Narcissus are always charming under shrub borders.

In the Tulips, the early-flowering varieties are perhaps best for naturalizing. The Cottage, Darwin and Breeder varieties, flowering in May, offer endless possibilities for massing in beds or borders according to height and color. The Parrot, Rembrandt, Bizarre and Bybloom types are best adapted for formal bedding, on account of their parti-colored effects. Darwin Tulips seem to be most popular for color schemes in long borders of exquisitely shaded soft colors.

Evergreens make a fine background for the flowers of these bulbs. In turn, the flowers lighten the somber greens that characterize evergreen plants just before they brighten up with the stirring of spring.

Order bulbs early, for the demand is great, and the choice stocks go fast. The planting may be done any time before the ground freezes. Be sure to mulch after planting, so that the alternate freezing and thawing will not heave the bulbs out of the ground. Leaves, hay or straw will do. Avoid the use of manure where it will come in contact with the bulbs.

clumps after the stems and leaves have become green in early spring; will show results when the flowers appear. Give them water in dry spells. This applies particularly to the late-flowering varieties. But don't stop watering when the flowers are gone.

Give Peonies plenty of room to grow in. They should have at least three feet distance apart in beds or border groups. Hedgerows may be planted more closely—about two feet apart. If combined with other flowers in garden beds, they will overpower their neighbors if too close.

Plant Peonies. Give them sunlight, food, water and sweet soil, and they will be a joy forever.

LIBERTY IRIS "The Fleur de Lis" of France

Long ago, so the story goes, a field of purple flowers swayed in the warm breezes that swept across the little "Flowery Kingdom" Japan. Close by the river's edge the blossoms danced as they saw their pretty reflections in the water and they were as gay as the little maids who frolicked along the paths. The blossoms were to be gathered for their lord's house, a banquet was to be given and beauty must be everywhere.

Suddenly a cold wind swept across the field, the warm sunbeams fled and the wee maids, looking affrightedly about them, saw a huge, black cloud spreading across the sky. And then came the rain, sheets of it, beating the flowers to the ground as the maids rushed to the shelter of a tea house.

When the sun came once more, chasing away the rain, what a sight met the eyes of the frightened girls as they peered timidly out. The field of flowers was flattened out before them, the poor, purple blossoms dragged and torn.

But, as they gazed, a rainbow arched the sky, its end seeming to rest in the iris-field. Here and there, the bright arch touched the flowers and, as the girls watched in wonder, the field of flowers once more waved in the breeze, but the flowers were no longer only purple. Creamy-white were they and palest lavender, golden yellow, blue, mauve, wherever the rainbow had touched, there was a flower the color of the rainbow! And so, to this day, this flower is known as "The Goddess of the Rainbow."

Today no longer are iris to be found only in Japan. The simplest, smallest garden in America may possess them. They grow so freely, they respond to care so readily, that, whether you own a vast estate or a suburban plot, you too, may find the end of the rainbow in your iris bed.

No other flower has so many combinations of color, especially of the delicate and unusual shades, and the name Rainbow Flower is most fitting. They are absolutely hardy, as beautiful in form, texture and coloring as any Orchid, and many are delightfully fragrant. They are not particular as to soil; will grow where anything will, but do better in well-drained locations. There is nothing prettier than this Liberty Iris, blooming from May 10th to June 10th. The colors are gorgeous and they completely hide the plant. Be sure and plant some Liberty Iris.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen.

Fall is always the proper time to plant Phlox. You will find you will have far better success if you set them out in the fall instead of waiting until spring.
